Code No: 134BU **R16**

JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD
B.Tech II Year II Semester Examinations, August/September - 2022
OPERATING SYSTEMS
(Common to CSE, IT)

Time: 3 Hours **Max.Marks:75**

Answer any five questions
All questions carry equal marks
- - -

1.a)	Explore operating system in users view point as well as system view point.	
b)	What is a multi processor system? Discuss its advantages.	[7+8]
2.a)	Illustrate the operations of operating system.	
b)	Discuss briefly the types of system calls provided by an operating system.	[8+7]
3.a)	Define process. Explain process state transition diagram.	
b)	Illustrate process creation on windows systems.	[7+8]
4.a)	Describe the Round Robin scheduling algorithm. Illustrate with an example.	
b)	Provide a solution to Dining Philosopher's problem using semaphores.	[8+7]
5.a)	Compare paging and segmentation of IA-32.	
b)	Demonstrate first-fit, best-fit and worst-fit for storage allocation.	[6+9]
6.a)	Describe paging hardware with translation look-aside buffer.	
b)	Illustrate Least recently used page replacement algorithm with an example.	[7+8]
7.a)	Explain mounting in network file system.	
b)	Make a comparison of C-SCAN and C-LOOK algorithms for disk scheduling.	[7+8]
8.a)	Demonstrate Banker's algorithm for deadlocks.	
b)	What is an access matrix? Explain implementation of an access matrix.	[8+7]
