Code No: 132AD **R16**

JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD
B. Tech I Year II Semester Examinations, March/April - 2023
COMPUTER PROGRAMMING IN C
(Common to EEE, ECE, CSE, IT, ETM)

Time: 3 Hours **Max. Marks: 75**

Note: i) Question paper consists of Part A, Part B.
ii) Part A is compulsory, which carries 25 marks. In Part A, Answer all questions.
iii) In Part B, Answer any one question from each unit. Each question carries 10 marks and may have a, b as sub questions.

JNTUH Used papers 2023

PART – A

(25 Marks)

1.a)	Explain the syntax of For loop.	[2]
b)	Explain about typecasting.	[3]
c)	What is function prototype?	[2]
d)	How is an array represented in memory?	[3]
e)	What is a dangling pointer?	[2]
f)	Write a program to find the length of a string.	[3]
g)	Give the syntax for Union declaration.	[2]
h)	What are the drawbacks of Bit fields?	[3]
i)	What is the use of rewind ().	[2]
j)	Why do we need to store data in files?	[3]

PART - B

(50 Marks)

2.a) Explain about the conditional operator with an example.
b) Write a program to calculate the bill amount for an item given its quantity sold, value, discount and tax. [5+5]

OR

3.a) Draw the flow chart to find the largest of three numbers.
b) Explain about the Do-While with an example. [5+5]

4.a) Write a program to print the Fibonacci series using recursion.
b) What are the pros and cons of call by value? [5+5]

OR

5.a) Write a menu driven program to add, subtract, multiply and divide two integers using functions.
b) Differentiate between linear and binary search with an example. [5+5]

6.a) Write a program to copy characters of a string from the mth position in another string.
b) Explain how generic pointers are different from other pointer variable. [5+5]

OR

7.a) Explain the following functions:
i) strlen() ii) strncat()
b) Write a program to read a text, delete all the semi colons it has, and finally replace all '.' with a ','. [5+5]

8.a) Explain about the command-line argument with an example.
b) Write a program using an array of pointers to a structure to read and display the data of a student. [5+5]

OR

9.a) Explain about the self-referential structures.
b) Write a program to add two complex numbers by passing structure to a function. [5+5]

10.a) Write a program to compare two files to check whether they are identical or not.
b) Explain about the functions to write the data from a file. [5+5]

OR

11.a) Write a program to randomly read the nth records of a binary file.
b) Explain the standard streams in C language. [5+5]
