JNTUH USED 21-06-18AM Set 2

R13

Code No: 118GM

JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD
B. Tech IV Year II Semester Examinations, June - 2018
PREDICTIVE ANALYTICS
(Common to CSE, IT)

Time: 3 hours **Max. Marks: 75**

Note: This question paper contains two parts A and B.
Part A is compulsory which carries 25 marks. Answer all questions in Part A. Part B consists of 5 Units. Answer any one full question from each unit. Each question carries 10 marks and may have a, b, c as sub questions.

PART - A

(25 Marks)

1.a)	What is Data Analytics?	[2]
b)	What is the meaning of epsilon (ε) in regression equation?	[3]
c)	List the different components of Logistic Regression.	[2]
d)	Describe about OLS.	[3]
e)	What is decision tree?	[2]
f)	List the applications of decision trees.	[3]
g)	What is Time series?	[2]
h)	What is STL approach?	[3]
i)	Write the scope of document.	[2]
j)	Give the structure of minutes of meeting.	[3]

PART - B

(50 Marks)

2.a) "Finding a relation among dependent and one or more independent variables" Suggest suitable modeling technique in detail.
b) How to impute missing Data in R? Explain PMM approach. [5+5]

OR

3.a) Illustrate the performance of binary classifier with ROC curve plot.
b) Explain the cluster analysis. [5+5]

4.a) What is nonlinearity and Explain about the logistic regression
b) Describe the confusion matrix, and its importance in classification. [5+5]

OR

5.a) Distinguish between bivariate and multivariate logistic Regression.
b) Explain about Hosmer–Lemeshow statistical test for goodness of fit for logistic regression models. [5+5]

6.a) What is the difference between CHAID and CART?
b) List the advantages of Decision Trees. [5+5]

OR

7.a) Discuss different methods are used by the organization to review skills and knowledge.
b) Describe the terms(KSC) :Understanding knowledge, skills and competence. [5+5]

8.a) Discuss the different components of time series analysis.
b) What is the difference between ARMA and ARIMA? [5+5]

OR

9.a) To perform the analytics task as predict the death for 5 years in future by using historical death cases and using ARIMA on "**Employee Health and Safety Data". What are the steps need to follow.**
b) How to clean the data, if data is incomplete? [5+5]

10.a) Explain the steps in writing a case study.
b) What is the purpose of documentation and give different documentation formats. [5+5]

OR

11.a) Give the structure of technical report and steps in client reports.
b) Write the steps required to create a new flowchart for a simple human resources recruiting process having seven process steps and one decision in Microsoft VISIO. [5+5]

---ooOoo---
