JNTUH USED 08-05-18 AM Set 2

Code No: 117JU **R13**

JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD
B. Tech IV Year I Semester Examinations, April/May - 2018
BIG DATA ANALYTICS
(Common to CSE, IT)

Time: 3 Hours **Max. Marks: 75**

Note: This question paper contains two parts A and B.
Part A is compulsory which carries 25 marks. Answer all questions in Part A. Part B consists of 5 Units. Answer any one full question from each unit. Each question carries 10 marks and may have a, b, c as sub questions.

PART- A

(25 Marks)

1.a) Differentiate between primary and secondary data of an organization. [2]
b) What is the importance of following safety rules and regulations at workplace? [3]
c) What are the two types of gaps in data identifying them? [2]
d) List the additional features of Scala compared to Java. [3]
e) Give the primary goal of big data analytics. [2]
f) What are outliers? Why should they be detected? [3]
g) How to choose test data? [2]
h) What is meant by hypothesis testing? [3]
i) What is data presentation architecture? [2]
j) What are the advantages of data visualization? [3]

PART-B

(50 Marks)

2. Is Analytics a key occupation in the structure of ITS sub sector? Justify your answer with relevant examples. [10]

OR

3.a) Demonstrate exporting all data on to a cloud like AWS 3.
b) How to ensure data quality? [5+5]

4. What is the importance of extraction, transformation and loading process in data management? How to identify gaps among the data? Demonstrate with an example.[10]

OR

5. What is knowledge management? What is its need in the organization? Discuss emerging trends in knowledge management process. [10]

6. What is data preprocessing? What is its need? Briefly explain various forms of data preprocessing. [10]

OR

7. What is descriptive analytics in big data analytics? Quote examples. Differentiate it from predictive data analytics. Which one can be used in dealing with social media data? Justify your answer. [10]

8. Machine learning tasks are classified in to three broad categories. Explain each category with example. [10]

OR

9. Compare and contrast machine learning and data mining methods. Quote examples.[10]

10. "Data visualization is both an art and science." Substantiate this statement with lucid examples. [10]

OR

11. Explain in detail the following options in Tableau tool:
a) Filtering b) Data segmentation c) Data enhancement [10]

--ooOoo--
