Code No: 136FU **R16**

JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD
B. Tech III Year II Semester Examinations, May - 2019
REMOTE SENSING AND GIS
(Common to EEE, ME, ECE, CSE, IT, MIE, PTM)

Time: 3 hours **Max. Marks: 75**

Note: This question paper contains two parts A and B.
Part A is compulsory which carries 25 marks. Answer all questions in Part A. Part B consists of 5 Units. Answer any one full question from each unit. Each question carries 10 marks and may have a, b, c as sub questions.

used paper 18-05-19 PM

PART - A

(25 Marks)

1.a)	Define the term image parallax.	[2]
b)	Write a short note on fundamentals of stereoscopy.	[3]
c)	List the advantages of remote sensing.	[2]
d)	Write about meteorological satellites.	[3]
e)	Differentiate between spatial and non-spatial data.	[2]
f)	What do you understand by attribute data?	[3]
g)	List the topology rules.	[2]
h)	What are the advantages of non topological vector data?	[3]
i)	List the advantages and disadvantages of raster data model.	[2]
j)	List out various errors in digitizing.	[3]

PART - B

(50 Marks)

2. Describe how scale of a vertical photograph is calculated? [10]

OR

3. Explain height measurement based on relief displacement in photogrammetry. [10]

4. Write in detail the basic elements of visual interpretation techniques with suitable examples. [10]

OR

5.a) Describe the general procedure involved in photo interpretation.
b) Explain the phenomenon of energy interactions with earth's surface materials. [5+5]

6. Explain the UTM Grid system and state its limitations. [10]

OR

7.a) Explain the four M's concept in GIS.
b) What are the fundamental operations of GIS? [5+5]

8. Write an explanatory note on spaghetti model. [10]

OR

9. Write a note on following:
a) Location based representations for spatio-temporal data
b) Entity based representations for spatio-temporal data. [5+5]

10. Describe in detail process of conversion of different raster formats. [10]

OR

11. Explain in detail different data input methods in GIS. [10]
